

Member events

Attendance at events – such as conferences, university career-days, seminars and ceremonies – is a regular part of the Medicines New Zealand calendar of activities. The General Manager and Chair are often called upon to make presentations and speeches at industry events on behalf of the Membership. Sponsorship of events is decided by the Board on a case-by-case basis.

Annual events include, but are not limited to;

Annual Parliamentary Dinner

Prominent personalities and experts from across the health sector in New Zealand attend, along with politicians who have an interest in the health agenda. This is a once-a-year opportunity to discuss the pressing issues facing New Zealand and to hear views and priorities of all parts of the sector is a vital part of Medicines New Zealand's collaborative work.

Value of Medicines Award Presentation

Medicines New Zealand introduced the Value of Medicines Award in 2011 as a way of recognising and promoting excellence in the medicines and vaccines research space. Each year the \$20,000 prize is presented to a researcher or clinician whose work shows the potential to improve the health of New Zealanders. Members are invited to attend the annual award ceremony.
